

Fukuno International provide various high quality lubricating greases from Nippon Grease Co.Ltd. as an agent for marine market.

Lubricating Greases

Greases for instruments and equipment, which realizes a longer operating life and maintenance free, are not merely used for lubrication of automobiles and industrial/construction machinery, but it serves now as important as an indispensable part for each precision instrument applied on.

Use : For lubrication of automobile/vehicle, various kinds of bearings, industrial/construction machinery, rolling mills, etc.

NIGACE BRR

EAL Biodegradable Grease applicable for VGP

NIGACE BRR is lithium, biodegradable grease, formulated with environmentally conscious ingredients effectively.

Because of less oil separation and good water resistance, **NIGACE BRR** is environmentally friendly grease, which can curb the grease dropping from wire ropes.

NIGACE BRR can be used as an EAL (Environmentally Acceptable Lubricant)coping with 2013VGP(Vessel General Permit)by the US EPA.

NIGLUBE SP-K

High Dropping Point Grease for wire ropes

NIGLUBE SP-K is an EP lithium grease, mainly composed of refined mineral oil as base oil. Having not only excellent EP property and mechanical stability, but also stable antirust property, **NIGLUBE SP-K** can be used as lead-free lubricating grease for high-speed/high-load/shock load bearing.

NIGHTIGHT LYS-1F

EP lithium grease for bearing

NIGHTIGHT LYS-1F is an EP lithium grease, mainly composed of refined mineral oil as base oil. It excels in not only EP property but also antirust property, water resistance, heat resistance, mechanical stability, and pump ability. **NIGHTIGHT LYS-1F** is usable for high-speed and heavy-load lubrication and especially suitable for a centralized greasing system in steel making facility.

All these greases are not using materials which are needed to indicate GHS marks, and using materials are for healthy, environmentally conscious and disaster free.
